# ABOUT GRASSTEX

**WARNING:** GrassTex does not simply make synthetic turf. We design synthetic solutions for all types of applications to perform at the highest level. Do not simply compare face weights. Ask your account manager why.

---

GrassTex is a world leader in manufacturing synthetic turf for residential and commercial applications. When it first opened its doors in 1976, GrassTex established itself as a pioneer in the creation of safe, durable turf technology. This innovative drive led to new advances in synthetic turf – it became safer, stronger and more natural in appearance. Developments like the Dow urethane backing, created for carpet in the mid-80's, increased synthetic turf's strength and durability. As synthetic turf technologies evolved, GrassTex adapted to meet commercial and consumer demand.

When the popularity of indoor soccer exploded in the mid 80's, GrassTex helped to invent the urethane backing which made the tough artificial turf of these fields possible. Huge strides were made to improve the overall quality and convertibility of artificial turf options. During this period of industry evolution, GrassTex was leading the way, pushing the creation of new technologies and constantly generating more advanced products. Soccer arenas, football fields, and putting greens were just a few of the major sports to benefit from the advances made by tougher, safer, more versatile turf.

GrassTex continues to offer the Hi-Tech turf system. The system now also incorporates cutting edge polyethylene monofilament fibers for playability along with a texturized nylon thatch for performance combined with a new Polyurethane backing in its new Arena Turf designs. The Polyurethane backing called Silverback™, is the newest and most advanced available. Now golf, football, baseball and landscape turf can benefit from the increased durability of our Hi-Tech Silverback™ backing system.

# LANDSCAPE

**PURE, QUIET STRENGTH.**

Imagine having the strength of 7 Olympic weight lifters or weighing over 400 lbs and being able to do one armed pull-ups. Our new SilverBack™ is the quiet strength under your new synthetic turf that gives you peace of mind your investment is protected by unmatched strength.

**OLD BACKING**

**SILVERBACK™ BACKING**

**PURE TECHNOLOGY**

- SilverBack’s coating system takes advantage of the most advanced technology in the coating industry.
- Engineered with quality in mind from the pure polyurethane chemistry to the application system.
- Features technologically advanced chemistry focusing on offering the highest quality components to create the best coating system available.
- Applied using an application system designed specifically for this coating system in order to have full control of the entire system.
- Certified Quality – Our ISO 9001 – 2008, ISO 14001 and OHSAS 18001

**STRENGTH IS IN OUR DNA.**

ArmorLoc™ 3L utilizes a complete woven system as the foundation to deliver the world’s strongest artificial turf system.

Primary backing plays a vital role in the overall design of an artificial turf system. ArmorLoc™ 3L is non-directional, dimensionally stable and ensures no excess movement. Combined, ArmorLoc™ 3L with Silverback™ urethane coating and specialized yarns work together binding the DNA of all three components creating a thermoset bond. ArmorLoc™ 3L delivers the science of DNA strand building.
